Galois Theory and Number Theory

Summer School | July 18-24 | Konstanz, Germany

3 courses (July 18-21) by

- **Lior Bary-Soroker** (Tel Aviv University): Statistical Number Theory in Function Fields
- **Pierre Dèbes** (Université de Lille): Number Theoretical Topics in Inverse Galois Theory
- **Arno Fehm** (Universität Konstanz): Irreducibility and Rational Points

Research Talks (July 21-24) by

- **Efrat Bank** (Tel Aviv University)
- **Jochen Koenigsmann** (University of Oxford)
- **François Legrand** (Tel Aviv University and The Open University of Israel)
- **Sebastian Petersen** (Universität Kassel)
- **Edva Roditty-Gershon** (University of Bristol)
- **Zeev Rudnick** (Tel Aviv University)
- **Umberto Zannier** (Scuola Normale Superiore di Pisa)

Registration: There will be some funds available for students.
Instructions for application and registration can be found on the website.
