Student project – Lecture Notes

- Lecture notes which reflect your own ideas and which clarify your questions and problems with the material can only be written by **yourselves**.
- Organization in groups reduces the individual work load and increases communication and contacts in your class as well as with the lecturer.
- Based on personal notes, text books, and notes of the lecturer you will write your own script and, almost without realizing it, you will thoroughly revise, learn and understand the lecture material.

Tasks:

- Reformulation of notes, additional comments and examples
- Design of useful figures supporting the explanations
- Text processing, setting up an index
- Organization of groups and distribution of results via Internet
- Proof reading
- Regular editorial meetings

Advantages

- You will get used to writing scientific texts
- Thorough revision of the lecture material is a side effect
- Publication as AG Technomathematik report
- Final lecture notes will suit your taste!

First meeting:
