### Sheet 2

**Deadline for hand-in: 29.11.2016 at lecture**

#### Exercise 4

(2 Points)

Consider the following linear program in  $\mathbb{R}^2$ :

$$\min x_1 \quad \text{subject to} \quad x_1 + x_2 = 1, \quad (x_1, x_2) \geq 0.$$

Show that the primal-dual solution (solution to system (2.4) in the script) is

$$x^* = \begin{pmatrix} 0 \\ 1 \end{pmatrix}, \quad \lambda^* = 0, \quad \mu^* = \begin{pmatrix} 1 \\ 0 \end{pmatrix}.$$

#### Exercise 5

Given the problem

$$\min (x - 2)^2 + 2(y - 1)^2 \quad \text{subject to} \quad x + 4y \leq 3, \quad x \geq y.$$

Set up the Lagrange function and solve the problem using the KKT system.
