Topological Vector Spaces

Maria Infusino
University of Konstanz

Winter Semester 2015/2016

Contents

1 Preliminaries **3**
1.1 Topological spaces 3
1.1.1 The notion of topological space 3
1.1.2 Comparison of topologies 6
1.1.3 Reminder of some simple topological concepts 8
1.1.4 Mappings between topological spaces 11
1.1.5 Hausdorff spaces 13
1.2 Linear mappings between vector spaces 14

2 Topological Vector Spaces **17**
2.1 Definition and main properties of a topological vector space . . 17
2.2 Hausdorff topological vector spaces 24
2.3 Quotient topological vector spaces 25
2.4 Continuous linear mappings between t.v.s. 29
2.5 Completeness for t.v.s. 31

3 Finite dimensional topological vector spaces **43**
3.1 Finite dimensional Hausdorff t.v.s. 43
3.2 Connection between local compactness and finite dimensionality 46

4 Locally convex topological vector spaces **49**
4.1 Definition by neighbourhoods 49
4.2 Connection to seminorms 54
4.3 Hausdorff locally convex t.v.s 64
4.4 The finest locally convex topology 67
4.5 Direct limit topology on a countable dimensional t.v.s. 69
4.6 Continuity of linear mappings on locally convex spaces 71

5 The Hahn-Banach Theorem and its applications **73**
5.1 The Hahn-Banach Theorem 73
5.2 Applications of Hahn-Banach theorem 77
5.2.1 Separation of convex subsets of a real t.v.s. 78
5.2.2 Multivariate real moment problem 80
