## Contents

---

<b>Introduction</b>	<b>iii</b>
<b>1 Preliminaries</b>	<b>1</b>
1.1 Topological spaces . . . . .	1
1.1.1 The notion of topological space . . . . .	1
1.1.2 Comparison of topologies . . . . .	4
1.1.3 Reminder of some simple topological concepts . . . . .	6
1.1.4 Mappings between topological spaces . . . . .	9
1.1.5 Hausdorff spaces . . . . .	11
1.2 Linear mappings between vector spaces . . . . .	12
<b>2 Topological Vector Spaces</b>	<b>15</b>
2.1 Definition and main properties of a topological vector space . .	15
2.2 Hausdorff topological vector spaces . . . . .	22
2.3 Quotient topological vector spaces . . . . .	24
2.4 Continuous linear mappings between t.v.s. . . . .	27
2.5 Completeness for t.v.s. . . . .	29

<b>3 Finite dimensional topological vector spaces</b>	<b>35</b>
3.1 Finite dimensional Hausdorff t.v.s.	35
3.2 Connection between local compactness and finite dimensionality	39
<b>4 Locally convex topological vector spaces</b>	<b>41</b>
4.1 Definition by neighbourhoods	41
4.2 Connection to seminorms	46
4.3 Hausdorff locally convex t.v.s	56
4.4 The finest locally convex topology	59
4.5 Finite topology on a countable dimensional t.v.s.	61
4.6 Continuity of linear mappings on locally convex spaces	63
<b>5 The Hahn-Banach Theorem and its applications</b>	<b>65</b>
5.1 The Hahn-Banach Theorem	65
5.2 Applications of Hahn-Banach theorem	69
5.2.1 Separation of convex subsets of a real t.v.s.	70
5.2.2 Multivariate real moment problem	72
<b>Bibliography</b>	<b>77</b>
